-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. As best understood by the examiner, Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lopez (US Patent No. 6,328,839) in view of Yoshitani (US Patent Application No. 2003/0079626).

As best understood by the examiner, Lopez discloses a method or device for processing large stamped letters where the large letters are placed with the stamps at the top facing upwards (See Figures 5, 10 and 14) on a conveying means (50), where the conveying means has a reference edge in the conveying direction (See Figures). A locally fixed rotation element rotates

the letters 90 degrees such that the longer edge rests of the reference edge (See Figures). The rotation element is a rotatably mounted, upright cylinder (See Figure 5). A sensor (48) detects the position of the letter (the leading letter edge). Lopez, however, fails to disclose the use of a canceller. Yoshitani discloses the use of a canceller that cancels stamps as mail is being conveyed for the purpose of processing and stacking mailpieces (See Paragraph 18). It would have been obvious to a person of ordinary skill in the art at the time of applicant's invention to modify Lopez by utilizing a canceller that cancels stamps as mail is being conveyed for the purpose of processing and stacking mailpieces.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
